Introduction:

It is necessary on the part of any organization especially social organization which runs with public funds and for public service. Likewise, a library that is a social institution also keeps relations with its users whom it gives services and other libraries whose resources are used by it. The first Law of Library Science “Books are for use” is firmly established if the libraries realize that their existence is justified only by the extent to which their books are used by the readers. Again, the third law of library science “Every book is of its reader” also gives emphasis on the same concept. But here books cannot move to their users. Therefore, all the efforts should be on the part of library itself to bring the books at the door step of users.
