Policy Statement on Water Conservation

Introduction:

The availability of water is limited though it is an important natural resource and a basic human need. So it should be used consciously and wisely. The college has taken an initiative to focus on water conservation and rainwater harvesting, reuse of water and purifying drinking water. The rainwater harvesting system is available in college campus. The rain water of the whole campus is systematically collected from rooftops of buildings in an underground tank. This collected rain water is used for plant through drip irrigation.

Objectives:

- To collect rain water in natural way from rooftops of all buildings.
- To reduce water consumption using proper disposal of waste water.
- To use drip irrigation to avoid excess use of water in maintain green campus.
- To monitor water utilization properly reserved in storage tanks.
- To reuse water which is emitted in water purification by water purifier
- To use human resource control over water supply and water used for gardening.

Water Conservation Policy:

- Rain water harvesting system in place to collect rainwater from rooftops and reusing it for plantation/gardening purpose.
- Tree plantation and gardening to maintain underground level of water.

- Meticulous use of drinking as well as other purpose water.
- Timely repairing of leakage, water pipes. Regular cleaning and servicing of water tanks/ purifier and other water bodies. Effective monitoring of water supply
- There is a dedicated manpower water supply for fresh water and garden use.
- Pure and safe drinking water supply using RO, water Cooler.
